

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) An antenna, comprising:

a ground pattern; and

a planar element, which has a feed point and is juxtaposed with said ground pattern, and

wherein said planar element has a trimmed portion causing to continuously change a distance between said planar element and said ground pattern, and said trimmed portion is composed of an arc, an edge of said ground pattern, which is adjacent to said planar pattern, is straight, and said ground pattern and said planar element are formed in or on a board without overlapping each other.

2. (Original) The antenna as set forth in claim 1, wherein said trimmed portion is formed from said feed point toward a side opposite to said ground pattern.

3. (Original) The antenna as set forth in claim 1, wherein said planar element and said ground pattern are formed extending along counter directions respectively.

4. (Original) The antenna as set forth in claim 1, wherein said ground pattern is disposed without surrounding said planar element.

5. (Original) The antenna as set forth in claim 1, wherein said distance from said trimmed portion of said planar element to said ground pattern is gradually increased as being farther away from said feed point of said planar element.

6. (Canceled)

7. (Original) The antenna as set forth in claim 1, wherein at least a part of an edge portion other than said trimmed portion is formed so as to be opposite to the ground pattern side of said planar element.

8. (Original) The antenna as set forth in claim 1, wherein said planar element has a cut-out portion formed at an edge portion opposite to the ground pattern side of said planar element.

9. (Original) The antenna as set forth in claim 1, wherein said planar element is symmetric with respect to a straight line passing through said feed point of said planar element.

10-12. (Canceled)
